

CareerBuilder's Labor Day Study Reveals 3 Major Forces Shaping the U.S. Job Market

PR Newswire
CHICAGO

CHICAGO, Sept. 2, 2016 /PRNewswire/ -- As the country gets ready to celebrate the contributions of American workers on September 5th, CareerBuilder is releasing new research that sheds light on the marketplace in which they operate. CareerBuilder's 2016 Labor Day study explores three key drivers of employment changes in the U.S., trends associated with each driver and occupations that are among those benefitting the most.

<https://photos.prnewswire.com/prnvar/20160831/403283LOGO>

"There are multiple factors that will influence job growth or deceleration, but most of the major shifts in employment today are tied to lifestyle changes, technology advancement and globalization," said Matt Ferguson, CEO of CareerBuilder and co-author of *The Talent Equation*. "Whether we're talking about the rise of the sharing economy, the power of smart technology or companies communicating in multiple languages and time zones, these trends are moving the needle on job growth for a wide variety of fields."

CareerBuilder's labor market analysis arm Emsi collects and interprets data from more than 100 national and local employment resources. While there are numerous variables that will influence employment shifts, for the purposes of this study, CareerBuilder and Emsi looked at a short list of trends that have played some part in the growth of specific occupations. The following tables highlight trends that fit within the main categories of lifestyle changes, technology advancement and globalization and show how specific occupations have been positively impacted.

Lifestyle Changes	Occupation Impacted	Current Number of Jobs	Number of Jobs Added 2012 to 2016	Percentage of Job Growth
---			-----	
People are choosing to eat out more, giving rise to the "foodie" generation.	Cooks, Restaurant		1,219,433	164,804 16%
